

▶ City of Whittier Boat Harbor Update December 29, 2011

- ▶ Repair work on the Harbormaster building began the last week of September and was completed by mid-December. The public restrooms and showers are up and running. We will finish the shower rooms with a plastic chair and clothing hooks.
- ▶ Waitlist renewals were sent out mid-November and moorage contract renewals were sent out mid-December.
- ▶ Harbor maintenance and repairs: snow removal of docks and launch ramp during the month. The west gangway and W-float require on-going monitoring for snow removal. The Harbor shop truck had the door repaired, Craftsman snow blower was sent in for repairs; and two additional Honda snow blowers were purchased.
- ▶ There were multiple power outages during December. Both generators performed well with no mechanical problems. The Harbor staff start-up the generators at least once a week.
- ▶ Harbor maintenance and repairs: on-going snow removal of docks and launch ramp during the month. The (new) west gangway and W-float required on-going monitoring for snow removal and de-icing under the gangway. Craftsman snow blower was sent in for repairs (still under warranty); and two additional Honda snow blowers were purchased after “retiring” two Simplicity machines.

Thank you,

Sue Miller
